Education

SRM Institute of Science And Technology
B.Tech in Computer Science and Technology
◦ GPA: 8.7

Aug 2023 – June 2027

Experience

- Collaborated within a cross-functional team of developers, designers, and project managers to design and implement new web application features, utilizing RESTful APIs to integrate third-party services and enhance functionality.
- Optimized application performance by applying foundational knowledge in data structures and algorithms (DSA), solving complex problems efficiently and contributing to a seamless user experience.
- Adapted quickly to new technologies and methodologies, achieving proficiency in full-stack development and reliably diagnosing issues to meet project milestones.

Extracurricular Activities

Web Development Intern
Cherry+Network

SRM University, Chennai
Oct 2024 to present

Technical Team Member
Blockchain Club SRM

SRM University, Chennai
Oct 2024 to present

Technical Team Member
Team Centinels

SRM University, Chennai
Sept 2024 to present

Projects

ChattingApp-WhisperNest

github.com/Arkachau05 

- A modern real-time communication platform using the MERN stack, supporting one-on-one and group chats, user authentication, active-status and notifications.
- Tools Used: JavaScript, React, TailwindCSS, MongoDB, NodeJS, Expressjs, Socketio

MovieWorld

github.com/Arkachau05 

- Developed a dynamic movie streaming website with real-time movie and series details using OMDb API integration. Implemented user authentication, allowing users to save and view liked movies and personalized recommendations.
- Tools Used: JavaScript, React, MongoDB, TailwindCSS, NodeJS, Expressjs

LookJobber-JOB-Seeking-Website

github.com/Arkachau05 

- Developed a job-seeking platform using the MERN stack, enabling seamless job listing, application tracking, and profile management for both job seekers and employers.
- Tools Used: JavaScript, React, MongoDB, TailwindCSS, NodeJS, Expressjs

Url-Shortner and QR Generator

github.com/Arkachau05 

- Developed a backend application using the MERN stack, streamlined support dynamic user interactions.
- Tools Used: JavaScript, React, MongoDB, TailwindCSS, NodeJS, Expressjs

Technologies

Languages: C++, C, Java, JavaScript

Technologies: ExpressJS, MongoDB, SQL, REACTJS
